

THE OAK
ESSENTIALS

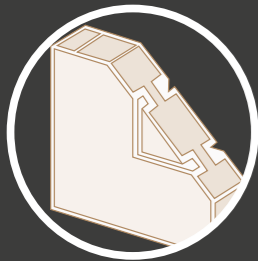

THE OAK ESSENTIALS

Deep luxury chamfered u-groove designs offer greater depth to the door and make it appear more striking compared to imitators with shallow square grooves.

American white oak veneers for the highest quality aesthetic.

Engineered construction for greater stability and performance.

Available to bulk order and can be delivered in batches at any time to suit the project.

A vast array of Fire Door sizes makes them essential for any project.

THE OAK ESSENTIALS

The finish

First impressions count, which is why our Oak Essentials are expertly crafted with precision, using the highest quality American White Oak.

Warm tones radiate from the real wood and the stunning texture of the timber grain offers an impressive finish.

Unfinished Oak

Doors will require a light sanding prior to finishing using a fine grade sandpaper. All timber surfaces should be fully finished before final fitting with a good quality paint, stain or varnish.

Use masking tape when finishing glazed doors to ensure that the finish does not go on the glass. Once you have completed finishing the door, remove the masking tape and the protective film from the door.

Also available in :

Pre-Finished Oak

All Pre-Finished doors will require any bare timber areas caused by trimming and hardware fitting, to be lightly sanded and finished with a good quality stain or varnish, before final fitting.

Also available in :

Our Essential door styles.

Our Oak Essential range has got bigger and better. Now including a beautiful Pattern 10 1 Light design and a 2XG design, with glazing that sits two thirds down the door.

Available as...

-  Doorsets
-  Pocket doors
-  Room dividers
-  Wardrobe system

Installation.

Three hinges should be used to hang all doors to prevent warping or bowing. Latches and locks should not be fitted adjacent to door mid-rails where the joint may be compromised. All hardware screw holes should be pre-drilled to prevent splitting of the timber.

Door Type	Door Style	Trimming allowance from each edge	Maximum trimming allowance overall
Panelled	Suffolk & Palermo	15mm	30mm
Glazed	Suffolk & Palermo	15mm	30mm
Fire Door	Suffolk & Palermo	2mm	4mm

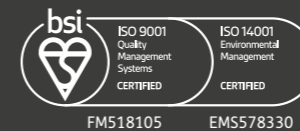

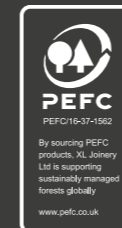

Maintenance.

To prolong the natural beauty of your door regularly clean the surface with a damp cloth. If the finish appears to fade after a few years simply apply a single coat of finish to renew its lustre.

Service.

Offering a highly professional and friendly service, we focus on offering expert technical advice and 5 star fulfillment.
